## PRIMARY LOGO

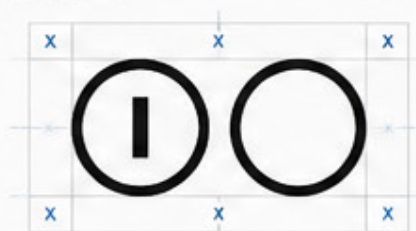

The primary logo is composed of two equal circles. The left circle contains a vertical bar (I), representing balance and simplicity. The design is minimal, geometric, and highly recognizable.

## LOGO CONSTRUCTION

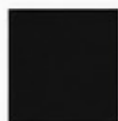

## CLEAR SPACE

Clear space around the logo is equal to the stroke weight (X/6) on all sides.

## COLOR PALETTE

## GEOMETRIC ANALYSIS

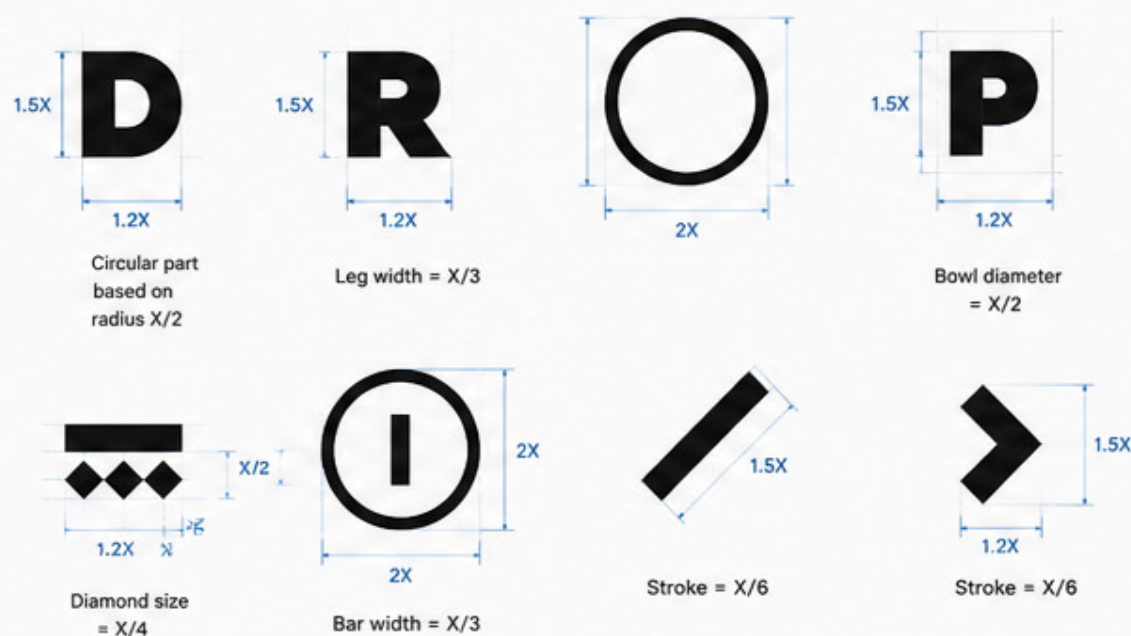

Let X = the stroke weight unit.

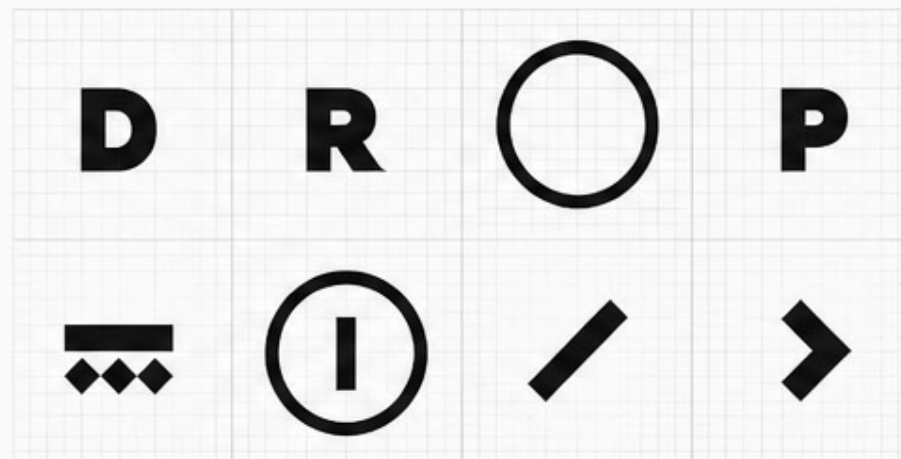

- Outer diameter of each circle = 2X
- Stroke weight = X/6
- Inner spacing between circles = X
- Height of vertical bar = X
- Width of vertical bar = X/6
- Corner radius of bar = (X/24)

All elements are based on a modular grid system for perfect proportion and scalability.

## ICON CONSTRUCTION & ANALYSIS

## ICON SET / SECONDARY MARKS

The secondary icons are derived from the same geometric language. They can be used as visual elements, wayfinding, or pattern components.
